

Case Study

Carlsberg-Tetley

Brief

To design layout and provide office furniture for over 300 staff at the Company's Corporate Office complex.

Client

Carlsberg-Tetley

Site

Leeds

Product Range

Glade

Once the £2.75m refurbishment of the existing 1960's six storey building was complete, suitable office furniture was needed to accommodate the 300 staff sharing approximately 650 sq metre of office space.

Leeds based Index Office Systems, one of Carlsberg-Tetley's main suppliers for this project were given the task of sourcing the furniture. "When I first saw the scale of the work to be undertaken, I had no doubt in my mind that Eurotek products would be ideally suited

to Carlsberg Tetley's requirements," said Index Office Systems Managing Director Peter Revell, who has overseen the installation work from start to finish.

Close consultation between manufacturer, supplier and client was paramount and Eurotek's CAD design team worked with Carlsberg-Tetley's Property Services department to achieve the most practical and imaginative furniture layout to meet the objective of the Company's space efficient, team working departments.

The solution laid with Eurotek's space-conscious Glade workstations which allow plenty of room for IT hardware on every desk and all the necessary cable management for each individual workstation. Low level screening is also a feature throughout, providing staff with a balance of privacy and team communication. Built in a matching Saxon Oak wood finish, Eurotek storage units have also been strategically sited throughout the building to meet the local storage requirements of the departments.

Winning factors

Flexible, robust furniture which is very easy to install

Dedicated CAD planning support to achieve best space efficient layout.
