

# Waldron Health Centre

## Case Study

---

Customer Care

---

One Stop Solution

---

Enhancing Working Environments

---

*High density waiting area fitted with bench seating*

Funded by the Public Private Partnership (PPP) known as LIFT (Local Improvement Finance Trust) and designed by Buschow Henley Architects, the newly built Waldron Health Centre has been noted as 'best example of the next generation of primary care facilities' by CABE (Commission for Architecture and the Built Environment). Once completed, the two phased

building will accommodate around 250 staff and will house four GP practices as well as various PCT community services such as Blood Taking, Foot Health, Physiotherapy, Dentistry to name a few.

*Access Bench System in white tops and silver frames with narrow under desk pedestals*

*Height adjustable desk via crank handle*

Following a comprehensive tendering process, Eurotek Office Furniture were selected out of eight companies. 'The successful supplier needed to be able to provide a 'one-stop' service for all the PCT's equipping needs, i.e clinical and non-clinical, sourcing goods and managing other suppliers so that the PCT's only needed to deal with a single point of contact,' explained Project Manager Ben Maguire.

Jigsaw seating for waiting area

Agio reception desk

As well as being able to provide this one-stop service, Eurotek's office furniture offers value for money and previous PCT contracts have proved that they are able to supply, deliver and install complete projects successfully and to the PCT's satisfaction.

The administration floor was furnished with Eurotek's popular Access bench system, housing some 70 staff. Other areas included treatment rooms, receptions, waiting and break-out areas.
